Document Change Record

Revision #	Effective Date	Page #	Nature of Change	Approval
Revised	**01/21/2025**		Addition of LCBO product	MH

1. Purpose

1.1- To identify the steps required for drivers to perform a successful tobacco and LCBO product delivery to wholesale stores.

2. Scope

2.1. This SOP applies to David Sobey Clerical team, DS Sobeys dispatchers, Drivers, Customer, DS Claims, Whitby RSC.

3.0 Tobacco and LCBO verification Process

3.1 Tobacco totes will be closed by Whitby RSC using 2 seals and 3 machine straps.

3.2 using the XD1003 report, the driver will determine how many totes he is expected to have for the customer delivery.

3.3 using the XD1004 and LCBO BOL report the driver will determine how many cases of LCBO product he/she is expected to have.

3.4 Driver will verify the license plate number on the XD1003 report against the license plate sticker on the tobacco tote.

3.5 Driver will verify the cases documented on the XD1004 report and the LCBO BOL to confirm they are the same.

3.6 Driver will confirm all license plate numbers on XD1003 report are fully accounted for on total number of tote stickers.

3.7 Upon arrival at the customer location, the driver will locate the tobacco totes first and deliver all required totes to the Cashier area of the store or another location determined by the receiver.

3.8 With the customer present, the driver will confirm all totes have the required 2 seals and 3 machine straps affixed and in order. The driver will document on the XD1003 report that all seals and straps are in place.

3.10 Driver will then bring all LCBO product into the store and drop in the same determined area. Driver will confirm all cases are accounted for. Driver will confirm the cases are damage free.

3.11 Driver will take a picture of all totes with straps and seals intact as well as all cases of LCBO product brought into store.

3.12 Driver and store will confirm that the quantities documented on the XD1004 report match with the quantities received at store. If so, driver and store will sign the XD1004 report in agreement. Driver copy AND store copy must be signed by both parties. Driver will provide store with LCBO BOL paperwork.

3.13 In the event of an LCBO discrepancy, please follow process identified in section 4.0.

3.14 With the customer present, the driver will proceed to break the seals and cut the straps on the first tobacco tote only.

3.14a Customer and driver will perform a full inventory piece count of product inside tote. The driver will document the total pieces counted on the XD1003 report alongside the license plate number in the space provided.

3.14b Driver will move onto the next tote and repeat the count process and documentation until all totes have been opened, counted and content piece count documented onto the XD1003 report all while in the presence of the customer.

3.14c Driver will count all tote piece count quantities and determine the total pieces for all totes combined and document this number on the "Total" line of XD1003 report.

3.14d Total line and computer-generated quantity total MUST match.

3.14e Providing all counts match, driver and store will sign the XD1003 report in agreement. Driver copies AND store copy must be signed by both parties.

3.14f Driver will provide the customer their copy of the XD1003 report and will retain his copy.

4.0 In the event of a discrepancy for Tobacco or LCBO

4.1 in the event of a discrepancy of either LCBO or Tobacco the customer and driver will conduct a second count of product and re confirm their totals on either XD1004 (LCBO) or XD1003 (Tobacco)

4.2 Should there still be a discrepancy, the driver must document the total number of pieces short or over on the driver copy and customer copy of the XD1003 (Tobacco) or the XD1004 report (LCBO).

NOTE- driver and customer MUST sign and print their names on both copies (Driver and Store copy) of the XD1003 and XD1004 report regardless of if the order has discrepancies or does not have discrepancies.

4.3 Drivers are responsible to report all details of shorts and overages to their respective dispatch teams immediately along with pictures taken of delivered product.

4.4 Details required are the following: Delivery Date, Route number, Driver Name, Driver ID, Carrier that driver works for, Is the discrepancy related to Tobacco or LCBO, Quantity short or over shipped (Tobacco or LCBO), License plate affected by the discrepancy. (Tobacco) All pictures taken.

4.5 Carriers respective dispatch teams must immediately send all reported details and pictures to the following email address: **TOBLCBOCLAIMS@sobeys.com**.

4.6 Drivers copy of XD1003 and XD1004 must be returned to David Sobeys dispatch at end of delivery day.

5.0 Definitions:

5.1 Tote- Plastic tote used by Whitby to pack Tobacco into.

5.2 Strap- Plastic strapping used in Whitby to secure the plastic totes.

5.3 LCBO- Liquor Control Board Ontario

5.4 XD1003- Report generated to document total count of tobacco shipped to store.

5.5 XD1004- Report generated to document total count of LCBO product shipped to store.

I have read the Standard Operating Procedure for the Tobacco count and by signing this document I acknowledge and agree to the contents listed within and declare that I have the authority to acknowledge / agree to this process on behalf of the company/organization I represent.
